Indus Orbit

THE GENERAL INTELLIGENCE COMPANY OF INDIA

Intelligence, built together.

Messaging + Terminal

A core philosophy, a brighter visual world, and a proposal for a simpler website.

Core identity preserved. New visual treatments and page organisation are proposals for review.

Portal of opportunity / proposed soft-dawn study

Two offerings. One shared purpose.

The owner's latest product hierarchy is the organising rule for the entire brand and website.

Messaging

People, relationships and context. Private conversations and relevant community or event groups help people find one another and carry shared intention forward.

Terminal

Useful intelligence and action. A focused working environment helps a person explore, plan and build while understanding permissions, cost, state and outcomes.

Events, communities, learning, programmes, shared work and research extend these two offerings. They add context and depth; each does not need to become another first-visit platform choice.

People become more capable when possibility is shared.

Indus Orbit helps people find one another, exchange knowledge and turn worthwhile intentions into useful work with intelligence.

A practical promise

Help someone find a worthwhile next step, a person to share it with, and the intelligence or tools to carry it forward.

A larger responsibility

Let the benefit reach beyond the person already at the centre. Design participation for different places, abilities, backgrounds and starting points.

The established pillars, expressed through behaviour.

Connection

Clear invitations. Relevant introductions. Consensual contact. Conversations with context. A newcomer can understand where to begin.

Synergy

Shared knowledge and effort. Useful tools. Clear authorship. People stay in control of work they make together.

Society

Access, care and real contribution. Consider mobile, bandwidth, language, ability and safety. Show honest evidence of benefit.

Decision tests: agency / belonging / usefulness / care / truth. These guide review; they are not five more public pillars or navigation tabs.

The company is the umbrella.

Keep one identity. Make the two offerings obvious. Explain extensions when someone needs them.

Indus Orbit / Intelligence, built together.

Messaging

Conversations / connections / groups

Terminal

Useful intelligence / work / control

Participation

Events, communities and programmes

Capability

Learning, skills and mentorship

Evidence

Research, writing and shared work

A portal of opportunity.

The confirmed traveller-and-frame image is the reference. Its primary meaning is opportunity, capability and contribution.

A familiar starting point

An ordinary person in a recognisable place, with agency and a worthwhile intention.

An opening

The frame suggests learning, connection, making or contribution. It need not imply a literal software feature.

A useful continuation

Show what becomes possible for people and society. Keep the world earthly and the action believable.

One grammar.
Many people and possibilities.

A conversation

Two people discover a shared purpose. The frame opens onto a gathering, a library or collaborative work. Messaging is the enabling relationship.

A useful idea

A builder works thoughtfully with a tool. The frame connects intention to a practical outcome. Terminal supports the work; human judgment remains central.

A new capability

An apprentice, a returning learner or an experienced mentor grows through knowledge and practice. Give each person their own agency.

A wider benefit

A neighbourhood or collective makes something useful together. Show contribution without a guaranteed-outcome or saviour narrative.

Rooted. Human. Full of possibility.

Observed core references: lived places, human conversation, roots, dawn and a considered pixel-illustration language.

Place + warm horizon

Human conversation

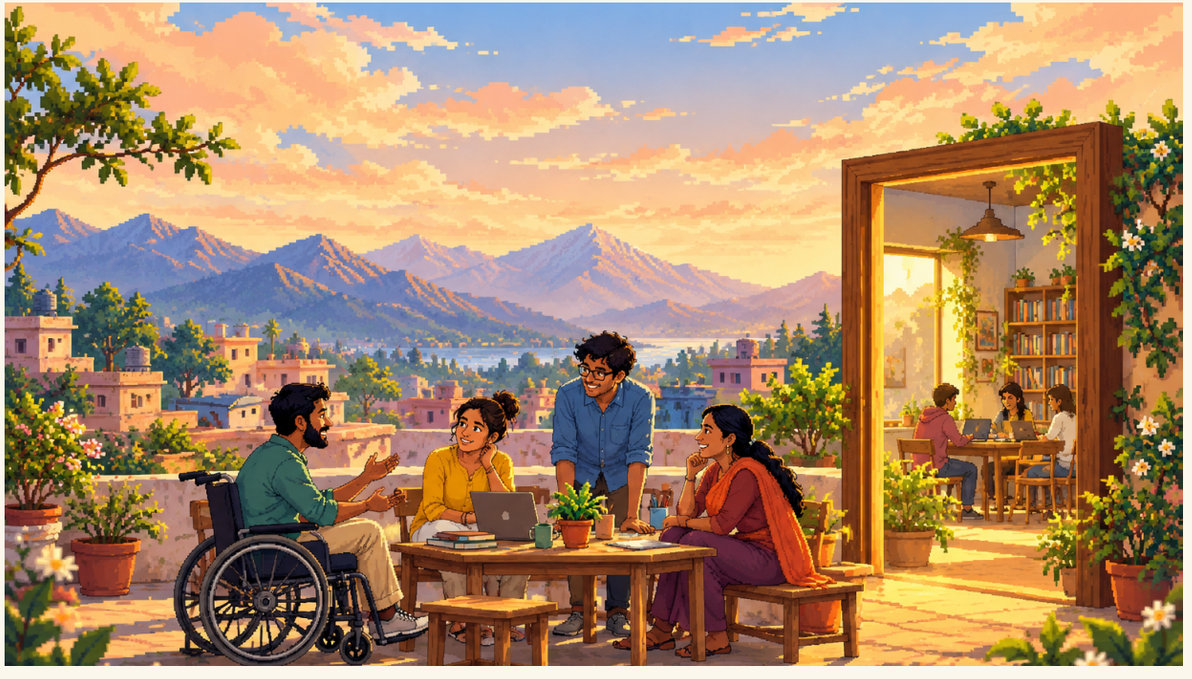

Roots + continuity

INK PAPER SAFFRON GREEN PEACH SKY

Keep the craft and feeling. Select subjects by meaning. Pixelation alone does not establish brand fit.

Soft dawn. Clear intention.

Proposed evolution: lighter paper, open shadows, warm peach light, quiet sky blue and precise working surfaces.

Messaging + Terminal / image concepts

Lift middle values, preserve crisp contours, soften distant forms and keep a few deep anchors. Avoid applying a global blur or glow to controls, people, logos or text.

Atmosphere in the art.
Clarity in the interface.

Original to soft dawn.

Preserve the original. Review a separately named derivative before a production rollout.

Original / preserved master

Proposed AI art-direction study

The generated study interprets light and palette; it is not pixel-identical. The visible sun and some small details vary. Final production derivatives need a fidelity and crop review.

Only the opening is dreamlike.

Owner correction, 22 October: blur only the scene inside the portal; keep the surrounding pixel artwork, traveller, frame and quote sharp.

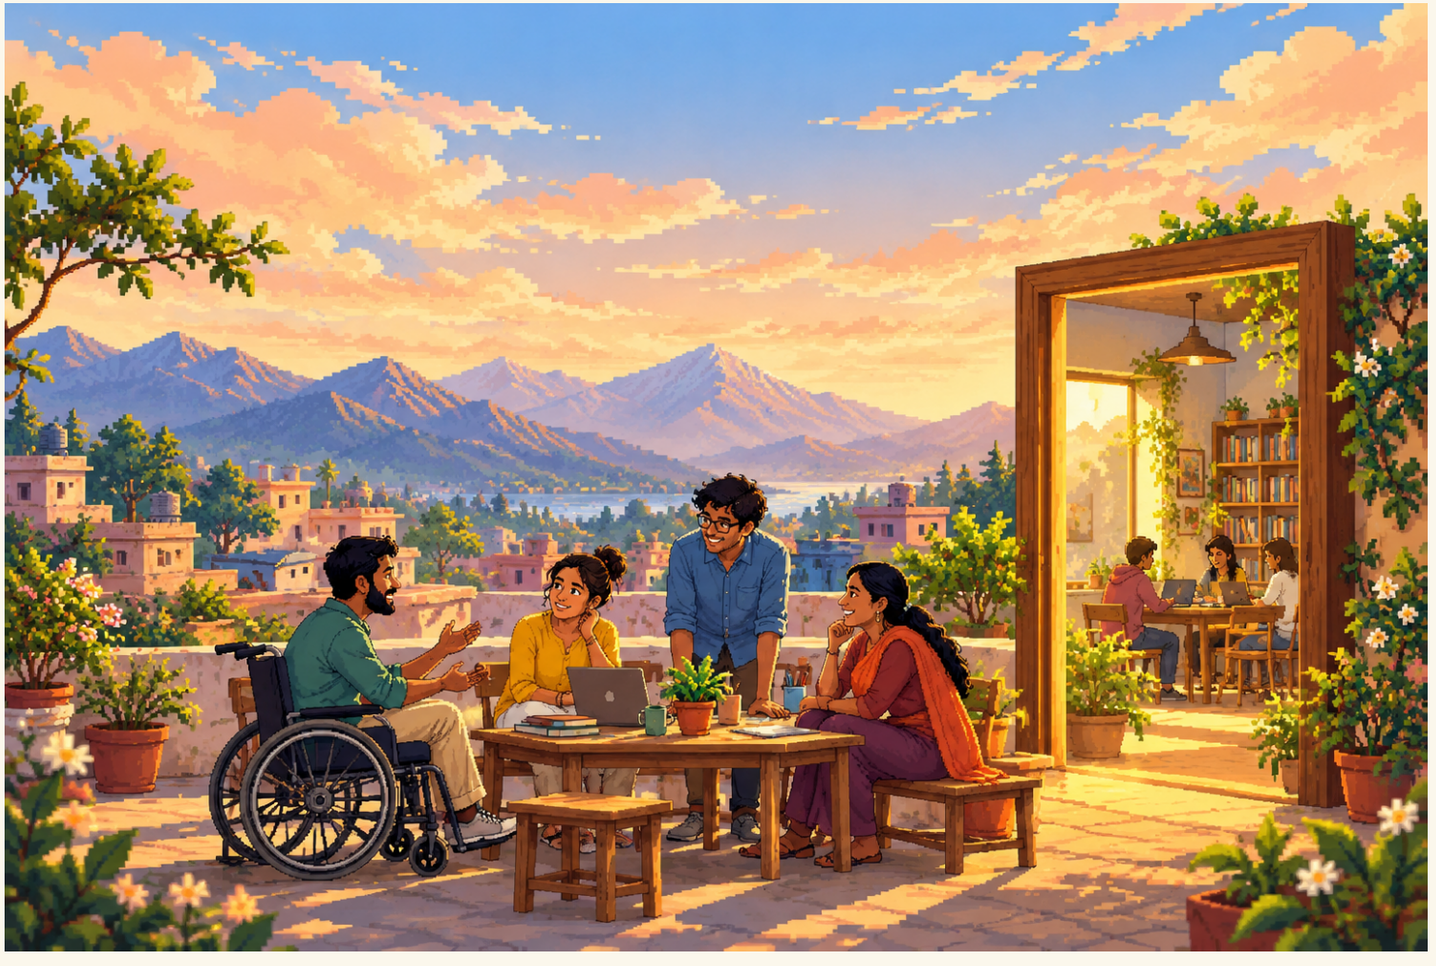

Intelligence, built together.

The approved line is crisp over the sharp earthly scene. Only the sky within the frame softens into possibility. This is the selected campaign picture treatment; it is not a global image or interface blur.

Use a separately named derivative. Preserve the original. For a live webpage, retain essential wording as accessible text and avoid redundant headlines around a quote-bearing picture.

A conversation opens a possibility.

People are the focal point. Warmth comes from attention, light and lived detail. The frame can lead toward another place to learn or work together. This is a concept illustration, not a real event or member photograph.

Proposed picture asset / visual review edition

Useful intelligence meets human agency.

Show a person working with intention, rather than a robot or disembodied brain as the hero. Tools support judgment. The frame relates the work to a practical shared outcome; it does not promise automatic real-world execution.

Proposed picture asset / visual review edition

A coherent cast, with room for real variety.

Agency

People make choices, contribute and work. Avoid passive mascots, saviour poses and guaranteed transformations.

Variety

Different ages, genders, abilities, roles and backgrounds. Do not use one young male builder as the universal member.

Everyday places

Include contemporary homes, libraries, workshops, neighbourhoods and campuses alongside rural places. India is not only monuments or mountains.

Consistent craft

Keep an intentional apparent pixel scale, coherent anatomy and clear silhouettes. Review hands, mobility aids, expressions and crops.

Bright surfaces. Deep anchors.

Proposed sRGB proof palette. These references are not exact translations of current OKLCH tokens or already-installed theme values.

Indigo ink
#20234E

Warm paper
#FBF7EC

Paper light
#FFFDF7

Saffron light
#EFAD45

Deep amber
#875000

Monsoon green
#316B53

Sky mist
#DFEAF1

Dawn peach
#F9D8BE

Indigo / warm paper 13.89:1 | Indigo / saffron 7.60:1 | Deep amber / paper 6.17:1

Saffron / paper is only 1.83:1: use it decoratively, not for essential small text or the sole control boundary. Ratios are for these solid sRGB pairs; image, opacity and state combinations need rendered checks.

Editorial warmth. Working clarity.

Intelligence, built together.

Inter

Clear actions. Readable dates.
Calm conversations.
Precise permissions and state.

Fraunces

Selected editorial titles and moments of welcome. Use enough weight and contrast for the actual size and crop.

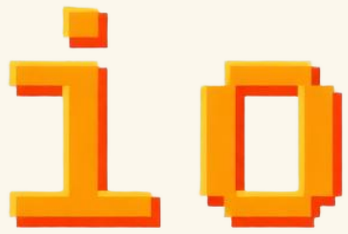

Proposed web scale

Titles 40-72px desktop / 32-44px mobile.
Body 16-18px / line-height about 1.5-1.65.
Working information 14-16px.
Avoid tiny tracked text as a default.

Keep text live. Pixel-style lettering can be a limited campaign treatment, not the working interface font or essential text baked into a scene.

Use the actual pixel master.

The existing master is a dimensional gold/orange pixel io on a pale canvas. It has no orbit ring.

Preserve geometry and colour

No rounded substitute, invented ring, stretch, rotation, extra glow or art filter on the mark.

Make a reviewed export pack

Record optical bounds, minimum sizes, clear space and appropriate light/dark exports. The current raster is not a transparent vector master.

Warm, lucid, rooted and exact.

Lead with a task

Prefer: Find people to work with. Avoid requiring someone to decode 'digital gravity' before they understand the invitation.

State real availability

Prefer: This event accepts public guests. Use the actual registration state, not one badge for every event.

Explain authority

Prefer: Review this action before it runs. Do not promise read-only execution when the runtime policy is unverified.

Give a next step

Prefer: Your message could not be confirmed. Retry it here. Keep work and explain recovery without blame or theatrical claims.

Register what is already happening.

Observed 22 October: the public @indusorbit bio and nine visible reel covers. This is a bounded visual review, not an analytics or full-caption audit.

Place and heritage series

Lucknow, Delhi, Darjeeling/Guwahati, village/field and dawn imagery establish warmth, place and an invitation to participate. Keep the sense of place; improve text legibility.

S.O.D.A campaign

The visible application-oriented cover and programme reference are existing brand activity. Covers date to April/May. Record the campaign; verify current intake, dates and application route before calling registration open.

Documentary work

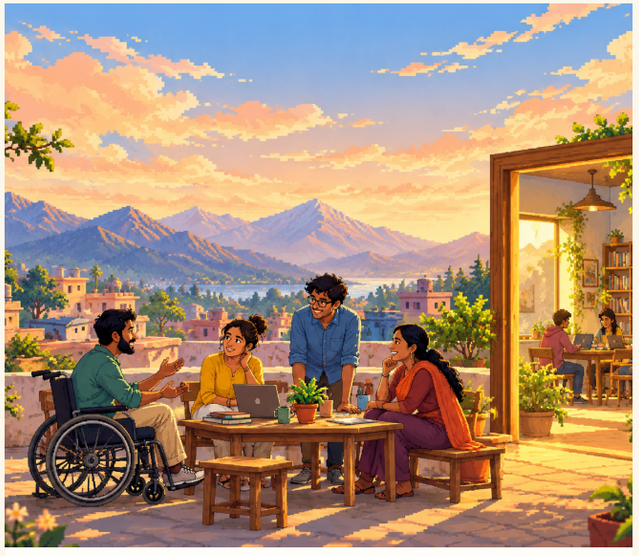

The visible workshop/robot cover belongs to actual work coverage. Documentary material can coexist with illustration when its role and provenance are clear.

Profile claim review

The current bio refers to an inference platform and an open-source model. Confirm current evidence before repeating those as released capabilities. Keep the approved company definition.

Three clear cover families.

Illustrative templates for the proposed direction. Typeset separately; keep essential information out of the artwork.

MESSAGING

A worthwhile conversation.

Indus Orbit / Design example

TERMINAL

An idea becomes useful work.

Indus Orbit / Design example

OPPORTUNITY

A place to begin.

Indus Orbit / Design example

Every live event/programme cover needs current title, date, place, scope and one route to act. Maintain safe crops for feed, square and story formats. These concepts are not live campaign announcements.

The problem is competing hierarchy.

The current source has a rich product and story. The first view asks people to process too many peer choices.

8

Primary public navigation links, plus a clock and account/join attention.

6-8

Unconditional to maximum page-level homepage sections, before considering nested cards.

17

Base member destinations, plus settings and contextual operator/account actions.

The hero adds a company headline, the short line, another card headline, a long audience list, two actions and a separate note. Heavy art overlays and stacked explanations compete with the human invitation.

Source audit: cea1892 and current working tree. A live public homepage review confirms the major hierarchy; this book does not establish the Netlify deployed commit.

One company. Two doors. Five sections.

01

A clear company invitation

Approved definition and short line. Messaging + Terminal. One sentence of human benefit.

02

The two offerings

Show each in plain words with one focused preview and an authentic next step.

03

Extensions of the two

Events, communities, learning, programmes, research and shared work in one concise overview.

04

How possibility becomes useful

Connection, shared capability and contribution. Portal imagery explains the relationship.

05

A worthwhile next step

Return to Messaging or Terminal. One compact footer; deeper routes remain discoverable.

A smaller menu, a complete company.

Messaging

The primary human-connection offering. Conversations, accepted connections and relevant groups. Keep Community access and group eligibility explicit.

Terminal

The primary intelligence/work offering. Setup, current availability, local runtime and control. Explain advanced tools when useful.

Explore

Events, communities, learning, S.O.D.A programmes, research and useful resources. Each has a clear relationship to the two main offerings.

About

One coherent company story and How it works. Brand, contact, support and deeper writing remain discoverable without crowding the primary bar.

Keep the new conversation system.

Simplify the surrounding shell rather than starting another messaging implementation.

First view

Conversations and continuing work first. Make Messages and the Terminal product switch obvious. Use secondary navigation for context.

Within Messaging

Chats / Connections / Groups. Preserve shared drafts, queue, visible read-through, anchored history, recovery and account boundaries.

Events and communities

Gathering and membership give conversation a context. Invitations remain understandable to guests; entering chat has its own verified sign-in/eligibility rule.

Recovery and trust

Use accurate Queued / Sending / Sent / Read / Failed states. Do not invent device-delivered or E2EE claims. Keep help, safety and privacy accessible.

A clear entry to useful work.

The DeepSeek Harness update is a separate runtime workstream. Branding and a download button are not proof of a tested, signed release.

First screen

Task, connection/setup state and a clear action. Reveal provider, routing, approvals, receipts and technical detail progressively.

Runtime identity

Preserve upstream and third-party notices. Distinguish the Indus Orbit adaptation, its version, upstream basis and preview status.

Download package

Show a real immutable artifact only after building and testing it. Include operating-system support, checksum, install/update/uninstall guidance and signing status.

Execution authority

Bind and verify runtime policy. A web mode label or cloud record cannot prove that the daemon will request approval or block an action.

A finite sequence, with clear review gates.

0 / DIRECTION	Approve the two-offering hierarchy, portal grammar, curation and concrete desktop/mobile proposal.
1 / PUBLIC ENTRY	Rebuild Home, navigation and footer with five sections. Correct availability/copy and preserve useful routes.
2 / OFFERING PAGES	Messaging and Terminal get distinct, accurate explanations and authentic access/setup paths.
3 / EXTENSIONS	Reorganise events, communities, learning, programmes and research without removing capabilities.
4 / MEMBER + TERMINAL	Calm member navigation; preserve continuity. Align the branded harness and truthful download surface.
5-6 / ACCEPTANCE + RELEASE	Complete asset/copy, accessibility, responsive/performance and real-persona/runtime evidence, then stage and promote deliberately.

Minimal in hierarchy. Complete in responsibility.

Understand

A first visitor can identify Messaging and Terminal, explain their purpose and find a relevant next step without a glossary.

Use

No 320px horizontal overflow or clipped actions; 200% text, keyboard, named dialogs, 44px key targets and reduced motion are reviewed.

Trust

Availability, registration, permissions, cost and outcomes match current evidence. No fabricated people, attendance, testimonials or open intakes.

Return

Drafts, context and account boundaries survive expected navigation, tab return and recovery. Genuine devices and supplier/runtime behaviour are checked in staging.

A reviewable direction, with an honest delivery boundary.

Established

Indus Orbit / The General Intelligence Company of India / Intelligence, built together. / Connection, Synergy, Society.

Owner-confirmed direction

Messaging + Terminal as the two main offerings; other areas extend them. Portal of opportunity, varied people and formats, brighter dreamy pixel illustration, Earth-rooted subjects.

Proposed and reviewable

New palette references, generated picture studies, moodboards, website hierarchy and prototype. These do not establish a deployed redesign.

Source records

The full Markdown guideline contains the complete 41-asset matrix, voice/style rules and production checklists. The separate code-level remainder report records implementation and runtime blockers.

What informed this edition.

CURRENT INDUS ORBIT SOURCE	Brand route, styles.css, original assets, website and product navigation; review dated 22 October 2026.
INSTAGRAM / @INDUSORBIT	Public bio and nine visible reel covers. Full posts required login; no private analytics or account change.
LUMA / INTERACTION REFERENCE	A clear invitation, focused next action and progressive detail. Indus Orbit retains its own identity and two-offering architecture.
W3C / CONTRAST	WCAG 2.2 text and non-text contrast guidance; complete rendered accessibility still requires review.
GOOGLE FONTS / FRAUNCES + INTER	Official font sources with accompanying OFL licences. Static review instances are embedded in this book.
PICTURE STUDIES	Generated from the confirmed local scene/style references for this proposal. Synthetic illustrations, not documentary evidence. Original masters remain preserved.

Every existing raster has a role.

41 source assets reviewed. Recommendations preserve files/history while changing meaning and prominence; referenced source is not proof of production visibility.

ASSET	CURRENT SOURCE USE	RECOMMENDATION AND REASON
assets/indus-orbit-logo.png	Public/app/I/O shells, Auth, certificates, Brand	Keep core. Actual approved pixel master; needs a reviewed production export pack.
assets/hero-india-dawn.jpg	Homepage; event cover family	Keep core / refine presentation. Grounded city/banyan/horizon, warmth and possibility. Preserve original; avoid over-darkening and invented geographic precision.
assets/about-banyan.jpg	About; event cover family	Keep core / refine presentation. Gathering, roots, place and continuity; improve legibility through composition rather than more darkness.
assets/contact-rooftop.jpg	Contact	Keep core. Human conversation in a lived place; useful reference for approachable characters and light.
assets/lotus-pixel.png	Homepage; event cover family	Keep core as secondary motif. Growth/nature signature. Its vivid pink is an illustration colour, not a mandate for the interface.
public/wiki-hero.jpg	What is Indus Orbit	Keep core for opportunity/orientation. Confirmed traveller/framed-sky reference; primary portal-of-opportunity metaphor, with brighter, thoughtful light.
assets/blog-community.jpg	Writing category art	Keep core / refine. People working around a table express shared effort; lift human detail and moderate orange saturation if making a derivative.
assets/blog-bharat.jpg	Writing category art	Editorial support. A lived market is useful context; not all of India should be represented through heritage markets.
assets/work-citylights.jpg	Our Work	Editorial support / refine. Shared infrastructure and a city are relevant; dense lights do not themselves prove work or impact.

Every existing raster has a role.

41 source assets reviewed. Recommendations preserve files/history while changing meaning and prominence; referenced source is not proof of production visibility.

ASSET	CURRENT SOURCE USE	RECOMMENDATION AND REASON
assets/footer-band.jpg	Footer	Editorial support / refine. River, trees and city fit place; the decorative textile-like strip and large scene should not make every footer heavy.
assets/cities-hero.jpg	Cities	Editorial support. Suits place/comparison content. Dense maps, monuments and dashboards do not belong behind key navigation or event facts. Verify geographic/analytical claims separately.
assets/blog-research.jpg	Writing category art	Editorial support. Desk/research context; historical objects and map are mood, not current research evidence.
assets/blog-playbooks.jpg	Writing category art	Editorial support / reassign. Workshop is relevant; the robot is a character in an article, not the central representation of members or intelligence.
assets/blog-announcements.jpg	Writing category art	Editorial support / refine. Noticeboard metaphor is relevant; image text is decorative and must not carry real announcements.
public/wiki-chapter.jpg	What is Indus Orbit	Editorial support / refine. Shared map/gathering is useful. Clothing, cottage and setting are not specifically representative of all Indian chapters; recurate for context.
assets/models-hero.jpg	Homepage and Models	Reassign to subject-specific support only. Observatory/telescope can illustrate inquiry. Style is painterly/flat with glow, not consistent crisp pixel craft. Remove from parent-brand lead imagery.
assets/brand-hero.jpg	Brand	Retire from core prominence. Giant ringed planet contradicts the owner's Earth-rooted direction; painterly style also differs from the sharper character references.
assets/blog-vision.jpg	Writing category art	Retire from core prominence / article-specific only. Human/banyan details fit, but a dominant ringed planet makes the scene cosmic. Preserve its pixel craft reference without adopting its subject.

Every existing raster has a role.

41 source assets reviewed. Recommendations preserve files/history while changing meaning and prominence; referenced source is not proof of production visibility.

ASSET	CURRENT SOURCE USE	RECOMMENDATION AND REASON
assets/soda-hero.jpg	SODA public/member pages	Reassign. Connected celestial-looking lights and skyline represent an earlier metaphor; a product-specific concept, not the core visual world.
public/soda-1.jpg	No literal source reference found	Reassign. Product/floral campaign concept. Not needed in a core identity or launch narrative.
public/soda-2.jpg	Homepage SODA section	Reassign / refine. Gathering is relevant; dense florals, bottles and distorted generated lettering turn it into a specific campaign. Label it as a concept if retained.
public/wiki-mission.jpg	What is Indus Orbit	Retire from leading identity. ASCII/code-filled glowing lotus is visually busy, lacks human action and conflicts with the quieter grounded direction.
public/wiki-story.jpg	What is Indus Orbit	Retire from leading identity / article-specific only. Magic-tech collage, gibberish lettering and neon beams do not explain how Stories work.
assets/merch-tee-pocket.jpg	Brand	Refine / concept. Restrained placement and pixel mark are close to the intended system; validate production master and embroidery limits.
assets/merch-tee-backprint.jpg	Brand	Reassign / concept. Pixel mark fits; oversized back print and pixel wordmark are an expressive garment option, not the default logo lockup.
assets/merch-tee-line.jpg	Brand	Refine / concept. Quiet placement and pixel mark fit; validate actual artwork/production before release.
assets/merch-tee-general-minimal.jpg	Brand	Refine / concept. Company-definition-led idea fits; check the exact visible wordmark and company line against the master.

Every existing raster has a role.

41 source assets reviewed. Recommendations preserve files/history while changing meaning and prominence; referenced source is not proof of production visibility.

ASSET	CURRENT SOURCE USE	RECOMMENDATION AND REASON
assets/merch-cap.jpg	Brand	Refine / concept. Pixel embroidery direction fits; prototype and verify geometry/readability.
assets/merch-tote.jpg	Brand	Refine / concept. Pixel mark and company wording are close; validate final spelling, lockup and print master.
assets/merch-bottle.jpg	Brand	Refine / concept. Pixel mark plus wordmark can work; no manufacturing/performance claim follows from the mockup.
assets/merch-notebook.jpg	Brand	Refine / concept. Pixel mark and restrained palette fit; dated "2026" should be collection metadata rather than permanent identity.
assets/merch-tee-signature.jpg	Brand	Retire from current official-kit prominence. "Bharat ka dimaag." is baked into the artwork and is not the approved current short line.
assets/merch-tee-pattern.jpg	Brand	Retire from current official-kit prominence. Older baked-in line and very dense repeating mark; retains campaign/history value.
assets/merch-tshirt.jpg	Brand	Retire from current official-kit prominence. Smooth io differs from master; printed "General Intelligence of India" omits "Company."
assets/merch-hoodie.jpg	Brand	Retire from current official-kit prominence pending corrected artwork. Embroidered mark is a different rounded/outlined construction.
assets/merch-mug.jpg	Brand	Retire from current official-kit prominence pending corrected artwork. Rounded mark differs from pixel master; small dark wordmark has weak visual legibility.

Every existing raster has a role.

41 source assets reviewed. Recommendations preserve files/history while changing meaning and prominence; referenced source is not proof of production visibility.

ASSET	CURRENT SOURCE USE	RECOMMENDATION AND REASON
assets/merch-kit.jpg	Brand	Retire from current official-kit prominence pending corrected artwork. Multiple smooth/rounded io variants make it an inconsistent master reference.
assets/merch-tee-tagline.jpg	No literal source reference found	Reassign / refine concept. Uses a pixel mark and company wording; name "tagline" should not redefine the approved short line.
assets/merch-tee-parisian-cream.jpg	No literal source reference found	Reassign / refine concept. Restrained garment exploration; inspect tiny print in a source master before calling it approved.
assets/merch-tee-parisian-navy.jpg	No literal source reference found	Reassign / refine concept. Tiny mark appears smoother and text cannot be certified from this mockup.
assets/merch-tee-parisian-saffron.jpg	No literal source reference found	Reassign / refine concept. A garment colour option; tiny mark/text need a production master review.
